KILLEN WHIPPED.

Joe McAuliffe, the California Giant, B asserts Himself. SAN FRANCISCO, September 11th .- The wo giants, Joe McAuliffe of California and

Pat Killen, heavy weight champion of the Northwest, met this evening in a finish contest at the Golden Gate Athletic Club rooms for a purse of twenty-five hundred dollars. Five ounce gloves were used. This was looked upon as a test of McAuliffe's ability, his friends claiming a wonderful improvement in his condition and science, and expressing the hope of his getting a return match with Peter Jackson, by whom he was defeated, should he prove the victor in to-night's battle. McAuliffe is six feet three and one-half inches in height, and weighed two hundred

Betting on the result was about even. The principals could not agree upon a referee, and decided to toss for choice, in which Killen won, and selected Mike Lucie. At 9:25 the men entered the ring. Mc-Auliffe's seconds were Paddy Ryan and Con Riordan. Killen was looked after by Dave Campbell and Professor Anderson. This relieved the anxiety that was caused by the reports of Killen's rearrest for violating the ordinance which prohibits sparring exhibitions in places where liquor is sold, on which charge he was until to-day under bonds, when his bondsmen with

> WITHOUT PRICE. Superstitions.

From the Youth's Companion. In villages among the mountains of Virinia and Pennsylvania, where habits of ife and thought have remained almost unaltered for two centuries, an odd custom still prevails which may be new to our readers. Prescriptions for the cure of Orange and the stricken father remaine different ailments-weak eyes, scrofula, with it in the railroad station while a mes consumption, cancer and hydrophobia-have been handed down in the same fam-

It is, simply, that we owe a part of our talents, our wealth, our strength, in short, of every good thing God has given us, to our brother, and that as soon as we begin to barter it for our own advantage, the virtue goes out of it. The selfish child or man, no matter how rich he may be in genius, knowledge or

money, will find life grow poorer and barer every year. He has not paid the latter saying that Canada had much to give tithes to his brother.

Just as the train was passing over Hackensack bridge, Joseph and his friend started to go into the smoking car. A storm was raging at the time, and as the young man was crossing the platform between the two cars a gust of wind blew off his hat. He made an attempt to catch it, and at the same moment another gust of wind lifted him off his feet. This, coupled with the movement of the train, threw him from the platform across the eastbound track. His head struck or the side of the track, crushing in his skul

TANNER REMOVED.

The Opposition to the Corporal Too Great to be Withstood.

WASHINGTON, September 11th. - The rumors of the past few days that Tanner was to be removed were confirmed to-day. Attempts were made in official circles to keep the matter a secret, but it is learned that on Monday night Tanner was reuested to resign, but refused emphatically. This morning he was officially notified not to touch any more papers in the Pension Office, and that the Department would not recognize any of his acts done officially. Smith was instructed to take charge of the office by Secretary Noble. Tanner is at his ooms with nothing to say, but hoping for reinstatement. The friends of General Brown, of Ohio, and Poole of New York, are hard at work for the place. Senator Hiscock and Secretary Tracy are support-

ng Poole, while ex Governor Porter is oking after Brown's chances. The statement made in the dispatches om this city to the effect that Tanner was to take the place of General Rosecrans, Register of the Treasury, is without foundation. Rosecrans will retire from his position it is true, but it is not to be tendered to Corporal Tanner.

STILL IN DOUBT Washington, September 11th.-The crisis n the relations between Secretary Noble and Pension Commissioner Tanner continues without settlement at a late hour tonight. Upon the best authority, it has been said, that the Commissioner has not een removed, nor has his resignation been requested by the President. The same authority says that though it has been patent for some time that serious differences have arisen between Secretary Noble and Commissioner Tanner over questions concernng the administration of the Pension office, it was not in anywise affecting the Commissioner's personal character in the sense of imputive or showing any corrupion in his acts. In the letter conveying his resignation the Commissioner writes that he recognizes that differences exist between imself and the Secretary of the Interior, especting the administration of the Penion Bureau, and these differences being radical in the interest of a thoroughly satisfactory administration, hence he should resign.

DISPOSAL OF OUR SEWAGE.

Dr. Rauch, Secretary of the State Board of Health of Illinois, was sent to Europe by that body to study the drainage and sewage systems. He has returned and is to

London, and I attribute it wholly to the cesspools under the houses. Two years sgo there was an ordinance against allowing any more of the house sewage to reach the sewers. From an engineer's standpoint, the Paris sewers are perfect, but from a sanitary view they are the The Paris death rate is higher than it is in

The best farm I found was at Berlin, where 17,000 acres are in use. A great deal of stuff is grown, a species of wire grass being particularly luxurious. It is fed to cows. I drank some of their milk, and could discover nothing objectionable. They have here both broad irr gation and intermittent fitration. The system is a success here, but they have the ground. The sewage is delivered to the farms by fire pumping stations in Berlin. It was a nuisance at first, but not so objectionable now. I believe the cost was 85,000,000 francs.

In England the same systems are a success at Brimingham and the London stations at Crossness and Croydon. All attempts to use the sludge at these places, however, have been failures. The London Metropolitan Board spent \$30,000 in an attempt to prepare the sludge for fertilizing. The farmers would not only not buy it, but they would not accept it as a gratuity. the work is done chemically. At the Crossness works I observed that the Thames was just as foul as the Chicago river, and it seems to be the best they can do. The sludge is carried with the chicago river.

Dr. Rauch said this question was attracting wide attention in Europe. "No less than three hundred systems of sewage disposal are patented. Many of these were suggested to me, but I did not interest myself in any but the electrical scheme. I think there may be something in that. The theory of "the eternal march of causes and effects," as Colonel Ingersoll calls it, does not appear so rational and admirable when they are

required to make sacrifice to it by giving up forever a child, a wife or a mother. It is all very well to say that a noble life enriches the world, and that to labor or others is at once both a duty and a reward; but that is not sufficient. The best of service does not reconcile either the systems of all the great cities of Europe, and expresses the belief that he has fath.

It is an entertainment that is dacious style; but it does not furnish any ourishment. His affluence of adjectives, facility of alliteration, and his frequen touches of wit and poetry make his discourses always readable; but they do not contribute anything to the popular welfare. Christianity is insulted, but not injured, by such assaults; and they are worth noting only because they serve by contrast to emphasize the superior excellence of the faith against which they are

Secret of the Skin. Did it ever occur to you that the skin vants exercise and gets very little? Nothing is a better tonic for the complexion than a brisk cold sponge bath on rising followed by vigorous rubbing with a dry towel, not too coarse, the face and neck receiving their full share of the friction un ess the skin is very sensitive, in which case the bare hands may be the instrument instead of the linen. This sets the blood tem. At bedtime a warm bath may be taken and the face should be washed slowly carefully and thoroughly with warm water and castile soap. The oily matter exuding from the skin catches minute particles of dust which cannot be removed in any other way, and many eruptions on the face are caused by nothing else than neglect of this imple precaution. After this wholesome eansing dip the face into a basin of clear, cold water, opening and shutting the eyes under the surface, and the flesh will be lef firm and healthy. This entire process will take barely ten minutes in the morning and twenty at night, and can, if needful, be taken from the regular sleep, the bath being quite as restful and refreshing.

This is, however, a risk that many persons, perceptibly drift ing into Bright's disease, diabetes, catarrh of the bladder, etc., constantly incur. So those who read reflect and heed the lessons of recorded experience, the advi-ability of using Hostetter's Stomach Bitters as a diuretic, need scarcely more than a suggestion. No fact is more generally admitted by the medical profession and the public than its efficacy for the prevenon of serious renal disease. A GENEROUS OFFER. David Lubin, of Weinstock, Lubin & Co. the firm whose enterprise and liberality have provided such a grand treat to fair visitors, still further surprised the people last night by making the following proposition to President Luhrs of the City and County Improvement Association:

Mr. Lubin proposes giving all the accessories to the games within the playground to the public, provided the State Society will pay one half the expense of many visitors from the country arrived in the city yesterday, and from this on the attendance at park and Pavilion will be large. There was a stream of visitthe citizens' half of the expense. This offer is made on condition that the place be kept open every day in the week, and to be free ably filled. All of its departments received to all. In order to meet the expense of servant-hire, tournaments shall be given periodically, at which an admission fee shall be charged.

This proposition was fully discussed last One of the features of the exhibit is the night by citizens, and all seemed to favor it heartily. It is estimated that the total expense would not exceed \$4,000.

City Attorney Church opened for the people, by stating that the whole question was simply as to whether or not this Court had jurisdiction in the matter of an offense committed on the Government lot, before mentioned. He thought that it did, for several reasons, viz: that it had not been shown by the defense that the Government ble to the laws of this State, by reason of the powers given in the Political Code, which ontrols and regulates the cession of land o the Government. This, he said, was fatal to the stand taken by the prosecution. It was all right to serve process there for crime committed elsewhere but it was not lawful to make arrests without such proces or when the crime was committed on the Government land. The attorney cited a number of authorities in support of his position, and then branched off on another line of defense. property of the National Government, and that the offense committed thereon is triable only by the United States Courts.

The United States Constitution provides and the Suprems Court has decided that the exclusive jurisdiction to try criminal offenses committed upon the territory of the United States is vested in the Federal Courts. The property of question is the property of the United States of America, and any person committing a criminal offense thereon can only be tried by the United States Courts. The remedy is quite as adequate as that afforded by the State Courts, since a Federal statute provides that any violation of a State penal law committed upon United States property within a State may be punished by the United States Courts.

Concluding that the right to examine the offense in question is exclusively vested in the United States tribunals, the defendant is discharged for want of jurisdiction.

Wrecks Reported Everywhere-Measure for the Safety of Vessels. NEW YORK, September 11th.—The storm ing water. The surf has twisted several of which raged at New York all day, continued last night. The waves at the Battery swept over the seawall into the streets. Never in the memory of the oldest inhabi-tants had the tide run so high, and it crept last night up to the level of the streets. The East and North rivers are almost deserted, and none of the smaller craft seem inclined to venture out. The high tide has created sad havoc in cellars along both river fronts, and as much as nine feet of water was reported in some of them before the tide

The Tribune in its story of the storm at Coney Island, says: Those who built houses upon the sands of Coney Island mourn to-day the loss of property worth about \$250,000. Hundreds of gingerbread pavilions of West Brighton have been destroyed, and the beautiful surroundings of the big hotels at Brighton and Manhattan beaches have been made a scene of desolation. New Things in Men's Jewelry. A meritorious match-safe is designed in mmitation of an Egyptian mummy. A pennant of diamonds, flying from a nasthead of gold, is a scarf-pin in demand among yachting fashionables.

A moonstone comic mask, displayed in relief on a surface of diamonds and rubies constitutes a scarf-pin of exquisite appear-A lawn tennis net of gold, on which rests a racquet of the same material and a

pearl representing the ball, is a very artistic scarf-pin. A ruby, held in the mouth of an elaborately-engraved silver dragon coiled into a ring, will find favor with those who prefer massive jewelry. The nickel key chains, which, when in-

roduced, were regarded as a senseless fad, have been found of such actual value that they have no doubt come to stay. There has been a sudden demand for gold and silver buttons, a class of ultra fashionable people having elected to wear colored dress coats instead of black. In some cases these delicately-hued garments are ornamented with diamond-set buttons, instead of bare metal, and the wearers also

effect diamond pins in their shirt fronts. -THE-

ELECTRICITY

THE DEVELOPMENT OF ELECTRIC POWER 1 is yet in its infancy. But it has made progress enough to indicate very clearly that it is destined to produce more changes in the industrial affairs and economic conditions of civilized life than have been produced hitherto by any agency of force that has been brought under the control of man. The progress that has been made so far in turning electrical energy to the service of man makes it certain that its use will become practically illimitable Its possibilities are yet, and probably will remain for a long period, beyond human forecast The application of electricity to the arts and ciences is no less marked than that to the human system. DRS. DARRIN & QUINLAN have made the subject of electric treatment a study for years, and have "harnessed and driven" it, to the great benefit of suffering humanity, until their names have become s household word. That they do cure is attested by the many cards handed us for publication, a few of which we here suomit:

MR. EDITOR:—In 1872 my daughter was taken

SAN FRANCISCO MARKET.

SAN FRANCISCO, September 11th.

FLOUR—Quiet movement with prices easy.
Net cash price for Family Extras, \$4 25@4 50

bbl; Bakers' Extras, -: Superfine, \$2 75@3 10.

WHEAT — The holiday of yesterday has neither improved business nor helped prices. The market generally has soft tone and the indications are that bottom has not been quite reached, though no marked decline is either probable or expected. No. I shipping qualities are quotable at \$1 26½@1 27½ \$ ctl.

BARLEY—The same monotonous feeling prevails that has existed for a long time. The demand for feed purposes is so limited that the market appears almost motionless. Brewing descriptions are more active and business in this line gives some animation to the situation. SAN FRANCISCO, September 11th. this line gives some animation to the situation. There is not much doing in Chevalier, though buyers can be found for a standard article. We quote: Old No. 1 Feed, 67½@70c; common grades, 65c; Brewing, 80@90c for fair to good and 95@97½c for choice; Chevalier, \$1 42½@1 45 and 95@97½c for choice; Chevalier, \$1 42½@1 45 for standard, and \$1 25@1 35 for common grades. OATS—The inquiry is fairly active, lut there is no pressing urgency noted in the movements of buyers. A really choice article is not readily obtainable, though stocks are liberal, but they are mainly of low grades. For the better class of product full figures are more easily obtainable than lower quotations for less desirable goods. We quote: Surprise, \$1 25@1 27½; milling, \$1 22½@1 23½; choice feed, \$1 17½; No. 1, \$1 10@1 12½; lower grades, \$1 65@1 07½; Gray, \$1 02½@1 05; new White, 97½c@\$1 07½; new Black, 90c@\$1 \$7 ctl.
CORN—Very little trade is being done in this article. There is no large array of stocks, but

article. There is no large array of stocks, but the demand is quite limited. Common White has sold at the inside figure, while it must be something choice to bring the higher quotation. Yellow receives the greater attention, but there is not movement account to give the market are. is not movement enough to give the market any appearance of activity. GRATEFUL-COMFORTING. EPPS'S COCOA.

BREAKFAST. By a thorough knowledge of the natural laws "By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our beakfast tables with a delicately flavored beverse which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Well Service Gazette.
